CLIMATE CRISIS: 7 Actions for 7 Generations

Manage your land like an Ecosystem Boss

Nothing beats climate change like nature based local solutions.

- Plant more native plants and trees which help capture stormwater and create wildlife habitat.

Step Lightly

Transportation is the #1 source of greenhouse gas (GHGs) emissions in the USA.

- Take more mass transit – buses, trains, and metro and say no to more highway expansions.
- Bike, scooter, walk more, carpool, drive fuel efficient cars, and fly less.

Eat More Plants

Animal Agriculture is the 2nd largest contributor to GHGs after fossil fuel emission.

- Cut down on meat consumption and eat more plants instead.
- Create your own garden at home or at school.

Become a Science Superhero

Community science projects connect people to nature and scientist gather valuable data.

- Check out a project in your area and use these apps:
ANS's Creek Critters®, eBird and iNaturalist.

Refuse, Reuse, Reduce & Recycle

- Think before you buy or take.
- Learn to live with less.

Follow the Children

Children are leading the future of the world.

- Support youth-led movements.
- Organize, mobilize and take action now!!

Up Your Political IQ

Become politically active to solve the climate crisis.

- VOTE in the 2020 elections.
- Fill out the 2020 U.S. Census.
